HOW WE HOLD THE PUBLIC INTERESTS

To attract the attention and hold the interest of the public, extra good values and good service are essential to any store. That is what this store has been giving to the public. Bargains, such as are quoted for Monday, give variety to the routine of business; by looking ahead and taking advantage of buying conditions we are able to make material savings. These we give to our customers, and we pull down our own profits to the very closest margin.

Pound Cake.

What musical instrument?
Saxophone.

What mythological deity?
Juno.

PAINE, WEBBER & CO.

(Special Wire to L. J. Overlock.)
BOSTON, May 8.—The sensational break in North Butte was the feature of the Boston market today. At the rest of the list opened strong and active, with Copper Range leading, and Shannon and East Butte following closely. North Butte, however, was weak from the start, several hundred selling at 67.50 and then breaking under a flow of liquidation and stop orders to 61.00, with twenty sellers for every buyer and fluctuations of a point or more between sales. From the low prices it rallied four points, but closed strong and bullish. Amalgamated acted very well today and we advise the purchase of Range, Shannon, Coalition, Greeney and Arizona Commercial and Corbin, as we do not think that these issues will be hurt by the nervousness in North Butte.

WALKER BROS.

(Special Wire to L. J. Overlock.)
NEW YORK, May 8.—The market today was strong and active and there was a very buoyant tone. Specialties were the principal features. Strength in steel gave the whole market a good tone and copper was also on the advance. We look for a fairly active market next week, and while the general trend is upward, we look for setbacks from time to time. The bank statement was not very good, and there was an increase in loans and a decrease in reserves.

MCGREGOR NOT GUILTY

J. W. McGregor manager of the Western Union office in Bisbee, was tried yesterday afternoon before Justice High on a charge of violating the territorial law making it a misdemeanor to employ a child under school age during school hours. The case was submitted to a jury, which brought in a verdict of not guilty.

SCREW WORMS IN HIS NOSE

Prominent Contractor at Mesa Recovering From Frightful Experience.

Victim Was For One Whole Week Unable to Get Any Rest.

MESA, Ariz., May 8.—With the entire cavity back of the nose and under the eyes filled with a living, working mass of screw worms gradually eating their way through the delicate membranes in the vicinity of the brain with the fatality of the absolute garrote, Alec Moffett, living in a temporary home on East Main street has for the past week suffered agony undecipherable. During the time that the first excruciating pains began shooting through the entire left side of his face and head and up until the time he has received temporary relief, he has rolled from one side of his cot to the other without hardly as much as closing his eyes in sleep.

Moffett was visited yesterday at his home, and while his nervous condition is in a pitiful condition on account of the strain placed upon it during the past few days, yet he was in a manner able to recount a few of the details relative to the case.

Mr. Moffett states that Wednesday of last week he came home from his work at the Mesa Dairy and Ice company, where he has had a contract to put in some cement work, and that he was of the opinion that he had an attack of grip. He is of the opinion that while lying out under the trees in his yard when he was first taken with the grip, that a fly deposited the egg which has caused the condition enumerated above. According to physicians an egg deposited by a fly will hatch in an hour, and the worm will immediately become active. Mr. Moffett states that he first noticed severe pains commencing in his lower jaw, and then extending around to the rear of his head and neck. These pains continued to increase until Friday, when he consulted a physician who removed eighteen small worms by means of the ordinary chloroform method. Mr. Moffett states that he was temporarily relieved after this, and had begun to believe himself on the road to recovery when the pains returned and in a short time they were even greater than at first. Added to the sharp pains extending around the side of the head were the grinding and grating of the worms that nearly proved the undoing of the man. The doche was freely used, but not until Sunday morning did the first real life sized worm begin to make their appearance. At this time, over seven, some of them over an inch long were expelled from the man's nose and were yet alive when placed in a small vial Monday. Mr. Moffett called at the office of Dr. Palmer and explained more of the life sized worms were removed. Mr. Moffett was crazed with pain and knew not what he was doing, and even yet is subject to nervous chills at short intervals. Messrs. Drane and Palmer have the case in hand and are giving it their close attention. They are of the opinion that the worms are nearly exterminated, if not entirely so, and the patient is of the same opinion.

Mr. Moffett and family came here last November with several parties from Jerusalem, Ohio. He has worked as a cement contractor while in the city and is at the present engaged at the Mesa Dairy and Ice company's plant. He worked at the Union high school building until it was completed. The physicians state that it is not an uncommon occurrence for screw worms to get in the nasal cavities, but the case of Moffett has offered complications out of the ordinary.

Terrill Medical Institute, (Inc.)

PERMANENTLY LOCATED IN EL PASO

The oldest, largest, best equipped, most reliable and trustworthy medical institute. Established and conducted by the foremost specialists of the country, doctors of national reputation who are graduates of the best medical colleges and institutions of learning in the world.
